

2004 IEEE Int. Workshop on Signal Processing Systems

The 2004 IEEE Int. Workshop on Signal Processing Systems was held October 13-15, 2004, in Austin, Texas. The theme was wireless networking on a chip. The workshop featured three plenary/keynote talks, 31 lecture presentations, and 32 poster presentations. There were 90 registered attendees. Of the 100 papers submitted, 64 were accepted. One accepted paper was later withdrawn by the authors.

Plenary Talks

- Prof. Teresa Meng, Stanford University, "[Digitally Assisted Analog Circuit Design for Communication SoCs](#)", 2004 IEEE Int. Workshop on Signal Processing Systems, Wednesday, October 13, 2004
- Prof. Robert Brodersen, University of California, Berkeley, "[Signal Processing in Future Radio Systems](#)", 2004 IEEE Int. Workshop on Signal Processing Systems, Friday, October 15, 2004

Registration Desk

The following picture was taken at the registration desk for SiPS 2004 using Myung Hoon Sunwoo's camera:

From left to right, the people are:

1. Myung Hoon Sunwoo, Ajou University
2. Wanda Gass, Texas Instruments
3. Thanos Stouraitis, University of Patras
4. Magdy Bayoumi, University of Louisiana at Lafayette
5. Brian Evans, The University of Texas at Austin
6. Wayne Bursleson, University of Massachusetts
7. Andy Wu, National Taiwan University
